
Crack the TCS NQT 2026

Secure Your Path to Ninja, Digital, and Prime Tiers

PLACEMENT PREP BLUEPRINT

| Why Target TCS in 2026?

Stability & Massive Scale

Targeting 40,000+ fresher intake for the 2026 batch, providing robust career stability despite market shifts.

AI-First Workforce

Join an ecosystem where 350,000+ associates are upskilled in GenAI, placing you at the frontier of tech transformation.

Global Opportunities

Work with 97% of the world's top banking and financial services organizations.

The Integrated Hiring Workflow

The Unified Test

A 180-minute proctored exam featuring Foundation (Aptitude) and Advanced (Quant & Coding) sections.

Performance Routing

One test determines your path. High Advanced scores unlock Digital and Prime interview tracks immediately.

All roles conclude with a single combined Technical, Managerial, and HR Interview round.

Core Technical Expectations

 Developer Coding Interface

Master One Language

High proficiency in **Java, Python, or C++**. Focus on OOPs, Collections, and Exception Handling.

Data Foundations

Strong command of SQL, Relational Database design, and complex query optimization (Joins/Subqueries).

CS Fundamentals

Core knowledge of Operating Systems, Networks, and modern Cloud/GenAI awareness.

Eligibility & Compensation

Hiring Tier	Academic Requirement	Compensation (LPA)
TCS Prime	60%+ (6.0 CGPA) Top Coding Perf.	₹9.0 – ₹11.5 LPA
TCS Digital	60%+ (6.0 CGPA) High Quant Perf.	₹7.0 LPA
TCS Ninja	60%+ (6.0 CGPA) Base Qualifier	₹3.36 LPA

Note: Maximum 1 active backlog permitted at the time of registration. Max gap of 2 years allowed.

| Recent Tech Pivots

500,000 AI Agents

TCS is pivoting from manual scripting to **Agentic Workflows**, planning to deploy half a million AI agents by 2029.

For freshers, this means baseline AI/ML awareness is no longer optional—it is a differentiator for Prime roles.

Hiring Target: 40,000 freshers for the 2026 batch remain the anchor goal.

| Top 5 Preparation Tips

-  **Master Advanced DSA:** Solve 180+ problems on LeetCode; focus on Dynamic Programming to unlock Prime roles.
-  **Daily Aptitude Drills:** The Foundation section acts as a high-volume filter; practice solving in under 60s.
-  **GenAI Portfolio Project:** Feature a GitHub-deployed project using LLM APIs to stand out in technical rounds.
-  **Mock NQT Tests:** Use the TCS iON portal to adapt to the restrictive section-based timers.
-  **CS Fundamentals:** Revise SQL Joins, Indexing, and OOPs lifecycle models thoroughly.

Your Prime Career Starts Today

Claim your spot in the 2026 batch.
